

Developing Downtown Mason

Dart Bank New Headquarters

Summary

- The entrance to Downtown Mason stood almost an entire block of underutilized and abandoned property.
- The project involved the demolition of multiple buildings and the cleanup of a contaminated site.
- Dart Bank completed their investment of approximately \$8M to construct their new headquarters to better serve the community.
- Green Elements - Geothermal and Storm Water Detention: Two wells draw from an aquifer which heat and cool the new building. This process is 400% more efficient than traditional heating and cooling methods. Features of the system you see are the “fountain”, which helps circulate water and the rain gardens which filter the rain water.
