Mt. Pleasant Fitness Trail

Michigan Municipal League - Community Excellence Award

ROWE assisted the City of Mt. Pleasant in applying for and obtaining a MDNR Trust Fund grant to complete a semi-circular fitness trail with an outdoor fitness equipment station in Island Park.

The trail, completed in Fall 2020, connects an existing semi-circular trail at the south and north ends of the park's 50 acres, while creating a circular paved pathway around the park's perimeter.

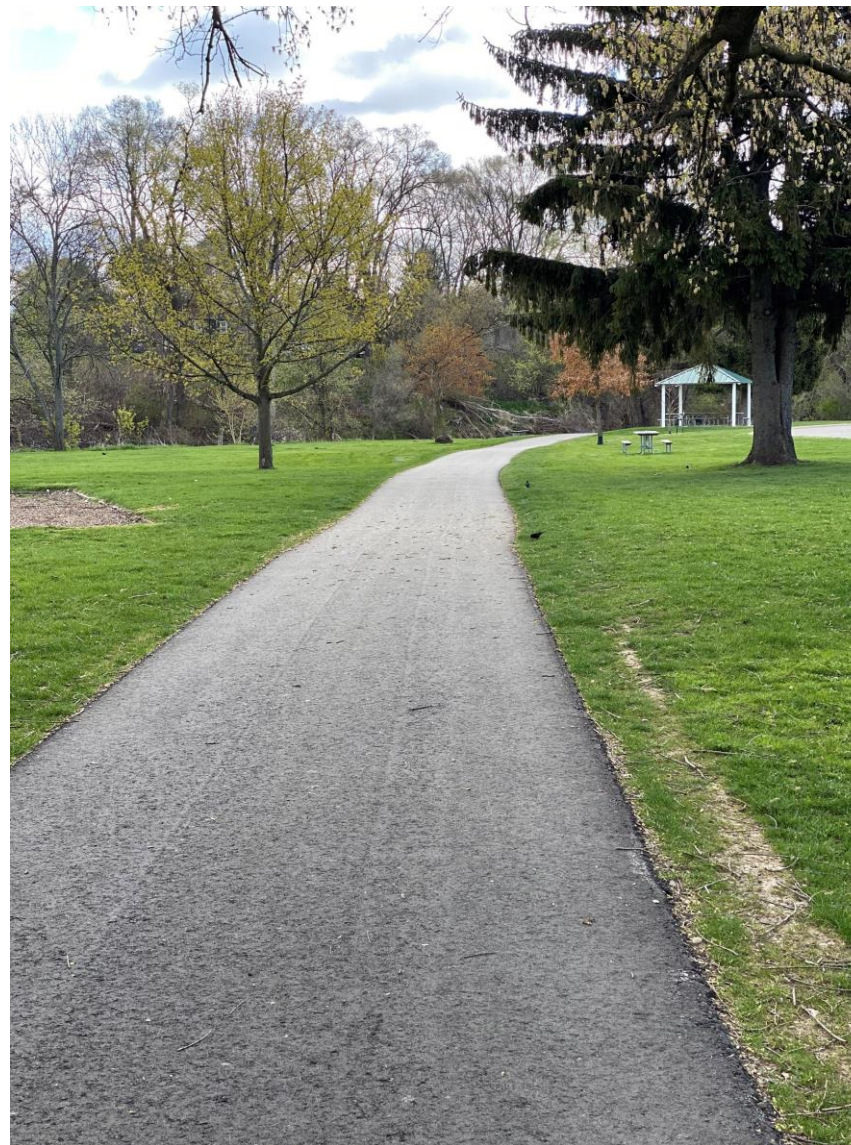

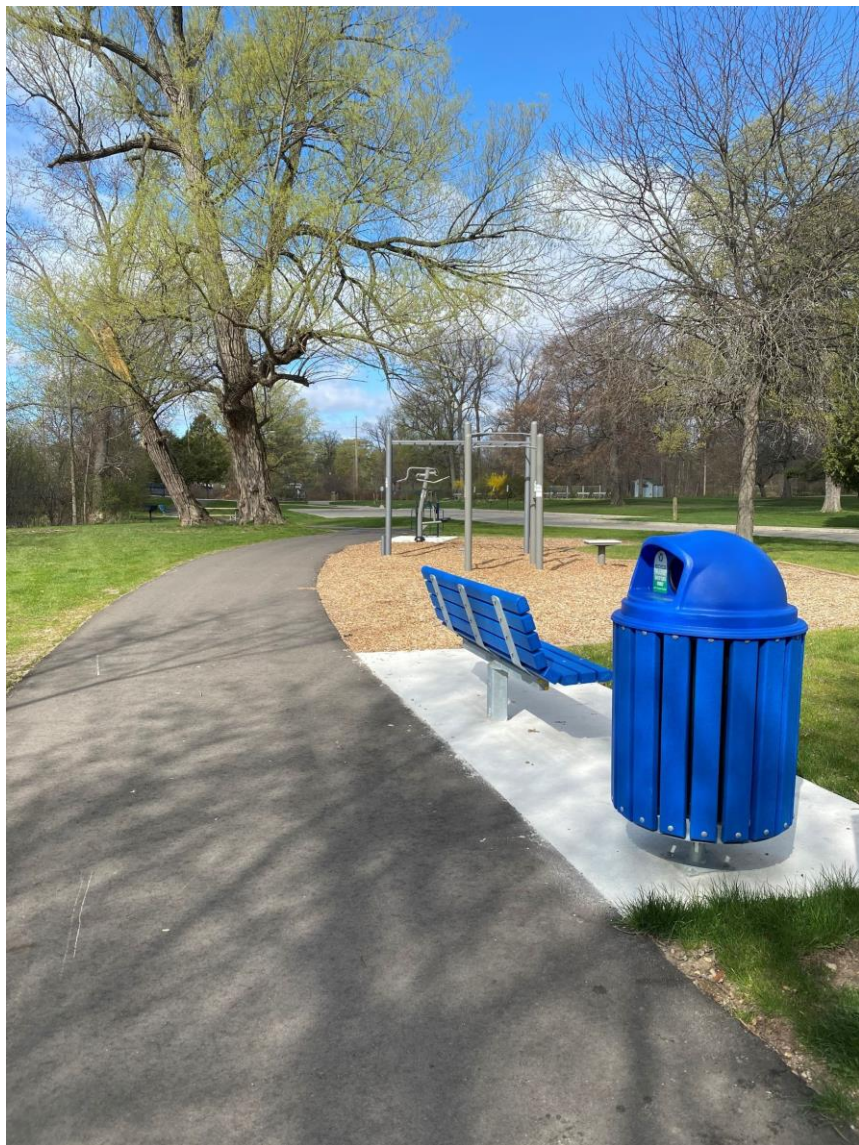

A prefabricated pedestrian bridge was brought in to replace an existing aging pedestrian bridge. The new bridge connects Island Park with Pickens Fields, incorporating an existing Vietnam Veterans Memorial in the overall site design.

ROWE succeeded in obtaining an EGLE/USACE joint permit for work within the project's 100-year flood plain. The project was funded through a MDNR Trust Fund grant and local funds.

Community Benefits:

- Increases access to and improves views of natural features.
- Improves public health and wellness by providing a "walkable" community.

THANK YOU
